Section 33. Programming and Diagnostics

In computing, reactive programming is a declarative programming paradigm concerned with data streams and the propagation of change. With this paradigm it is possible to express static (e.g., arrays) or dynamic (e.g., event emitters) data streams with ease, and also communicate that an inferred dependency within the associated execution model ...

Many of the campers will have been through the whole archery thing during previous summers. The number one rule is safety, but once that is taken care of it's best to introduce some new challenges on the archery field. Here are some games that will keep the campers (and the instructors) engaged and excited about the archery program.
